New Spa Touch 4™ and TP740 Topsides

In the spirit of flexibility and choice, we have two additional replacement options if a Spa Touch 2™ or Spa Touch 3™ panel ever needs to be swapped out. You can continue ordering the same panels or opt for one of the following alternatives based on the end user’s budget and preferences.

Two Great Options

Starting November 1st, dealers can place orders for new-and-improved replacement panels. Given that consumer opinions vary—with some expecting touchscreens and others preferring push buttons—dealers now have the flexibility to satisfy everyone. Below are some highlights and distinctions.

Spa Touch 4™ Touchscreen

Using different technology than either the Spa Touch 2™ or Spa Touch 3™, the **Spa Touch 4 touchscreen panel** has already proven itself a great performer. Benefits include:

Reliability: Extremely low incident rate and few (if any) issues with false touches.

Easy installation: Dealers can expect a normal panel swap out, with no major changes to the spa shell. However, Spa Touch 4 panels are about 0.1” (2.5mm) wider than Spa Touch 3. Hole sizes vary, so service technicians may need a small file to slightly widen the opening. In many cases, the new panel will drop in easily.

NEW!	Part Number	Dealer Price	Replaces
Spa Touch 4™	OP33-1905-08	\$450	Spa Touch 3

TP740 Push-Button Display Panel

For customers who prefer traditional buttons, **the TP740 is a great alternative.** Featuring a smaller color display—not a touchscreen—it uses buttons to the side of the screen. Plus, an overlay for easy button identification, which is ordered separately (see below).

Benefits include lower cost than Spa Touch 4 but equal reliability.

NEW!	Part Number	Dealer Price	Replaces
TP740 Panel	OP33-1906-08	\$178	Touchscreen 2
TP740 Overlay	OP11-0143-08	\$10.20	Touchscreen 2 Overlay

Sincerely

Artesian Spas™
